Joan,
Can you please be sure to connect with your R9 counterpart as soon as you hear back from USGS on the spikes?

All, Katie Walton-Day is a USGS hydrologist with the Colorado Water Science Center. Katie has extensive experience in the Silverton mining district. Please contact Katie regarding your data spikes. Once Katie knows what and where your anomalies occur, she can determine how best to explain them.

Bob, thanks for the conversation just now about apparent spikes or pulses in certain parameters showing in the water quality data on the San Juan and Animas Rivers. It makes sense that the rain events and stormwater flows would be a factor. As we discussed, you'll get your experts on this asap so we can help the data teams answer this question and we can factor it into our analysis.

The EPA Area Commander and his Deputy are copied on this email, so please "reply all" so the USGS information gets to Area Command and quickly as possible.
